

Residential Dishwasher
Rebate Program

Updated December 7, 2007

This rebate program is open to City of St. George single family residential water customers. The rebate is limited to one dishwasher per customer.

The rebate will be paid as a credit on the customer's utility bill.

An asterisk (*) in the model numbers below means that any character may appear in that position. Additional characters may appear before or after those listed.

EF is Energy Factor and is the number of loads that can be washed per kilowatt hour of electricity. Higher EFs are more energy efficient. Water Use is measured in gallons per load. To qualify, models must have a minimum EF of .67 and a maximum Water Use of 5.

If the model number of your equipment is not listed, your equipment does NOT qualify for a rebate.
