Barry Barnum (Water Services Director) 634-5800  
Marc Mortensen ( Assist. to City Manager) 703-0953

### **Water Use on the Rise as Temperatures in St. George Skyrocket**

As temperatures hit record highs this spring the City of St. George is asking its residents and businesses to water between 10:00 pm and 3:00 am. The City strongly discourages watering during the early morning hours due to the heavy draw on the water supply between 4:00 am to 9:00 am. Please remind your neighbors, family and friends to adjust their sprinkler clocks and water at night. By working together we can all reduce our use.
