I see no advantage for St. George citizens with this e-bus proposal. Supplying our tax money to enhance increased income for another city makes no sense to me or many of my neighbors. Perhaps more information for the citizens of this city might be a good idea, such as making all your meetings available for public viewing. I am surmising that money as well climate alarmists are behind the push for this shuttle system. I have read for years that climate change alarmists have for years wanted to end the traffic going through Zion National Park because they fear for the natural beauty of the area. I was elated that someone at the city had done their research and decided that Gillig e-busses as well as hydrogen fuel busses would not be appropriate for this program. The following climate information as well as EV (electrical vehicle) information was intended for my short public comment prior to voting on the program. The actual EV and 'sustainable energy' reports should be public knowledge for the citizens as well as the City Council who are considering options.

1. A fuel car with USA oil resources emits only 1% dirty emissions because our oil only has 1% impurities. Russian and Middle Eastern oils emit 41% dirty emissions due to their oil having 41% impurities. God has blessed this country with extremely clean oil. Climate alarmists do not want this information known. We are now burning more Russian oil. How can this be helping the environment?
2. Do we actually need less carbon in the air? Do we really want a goal of zero net carbon? Absolutely not. Carbon is the building block of nature and life. Without carbon, there is no life!
3. Do we actually need less CO₂ in the air? Absolutely not! We have an average of 0.039% CO₂ in the air. This is near zero! Without CO₂ in the air, nothing grows! Kids learn about photosynthesis in the second and third grades. They understand this concept. Scientists have easily refuted the concept of global warming causing worldwide famine by increasing the temperature of several greenhouses by 5 degrees Fahrenheit as well as pumping in ten times the amount of CO₂ in the air to 0.39%. What happened? Trees and bushes grew leaps and bounds. All flowers and crops harvests were four times the amounts normally grown in the outdoor air. We do not have a CO₂ problem. We do not have a global warming problem. We are actually in a global cooling phase (for 13 years now).
4. Do e-busses supply sustainable energy? Are they good for our planet? Absolutely not! Enormous additional amounts of earth minerals are needed for the lithium batteries for EVs. One gas-fueled car requires 5,000 tons of earth mined. One electric car requires 500,000 tons of earth mined. How much more for a bus battery? We can construct 100 gas-fueled cars for one electric car just considering earth minerals used. And the minors? All child slave labor.
5. Gillig states that one e-bus has a range of 150 miles per charge. Hardly efficient or feasible.
6. Tech Crunch released articles from European organizations that have evaluated the efficacy of electric vehicles (EV) over gas- fueled vehicles. France's High Climate Counsel's recent reports states "Due to

the embodied emissions arising from the huge supply chains required to mine and supply needed minerals, France's claim of achieving a national decline in CO₂ emissions was *illusory*." Emissions had actually increased, some reports stated as high as 70% over gas-fueled vehicles. Hardly what sane people want to do to the environment.

7. The CO₂ footprint to make an EV battery is equal to or greater than a lifetime gas-fueled car's emissions!
8. A driving range of 60 pounds of fuel is nearly equal to that of a 1000-pound EV battery. However, more fuel must be used for travel to compensate for the extra 1000# of battery weight in the vehicle. To offset this extra weight, manufacturers now use lighter weight metals such as aluminum and carbon fiber for the body of the car. Lighter metals require higher energy processing procedures as well as providing less protection for the occupants of the vehicle, hence greater severity of injuries and mortality rates. No energy saved here.
9. Please see reports also from the ICCT (International Council on Clean Transportation), whose findings agree with those of France. EV vehicles will destroy the earth at a far faster rate than anything else.

Please rethink any use of Electric vehicles, appliances, landscaping tools, etc. in the city.
Thank you.

Mayor Randall and members of the city council,

I was shocked when the declaration of NO public comments at the first council meeting of the month. While I understand the desire to be efficient with your time, having zero face to face exchange reeks of tyranny. Perhaps a compromise of some sort could be beneficial for all.

I'd like to propose a few simple rules as follows:

- 1) You must currently reside in St George.
- 2) Only one comment in person per quarter per citizen.
- 3) A maximum of 10 comments per month with a 3 minute limit for each.
- 4) Comments may be given at any council meeting until the limit of 10 has been reached for each month. New requests must be submitted each month after the 10th comment is given in the current month. No requests will be carried over to the following month.
- 5) Comments may be on any topic as long as reasonable decorum is observed.
- 6) Requests to speak must be made a minimum of 2 days in advance of meetings with name and address in writing. When more than 10 requests are submitted, names will be drawn at random at the start of the next meeting.
- 7) Additional comments from speakers may be submitted in writing for the record. Written comments are limited to not more than 1,000 words.
- 8) To keep communications open, the city council will hold a minimum of two 'town hall' meetings per year. One in each half of the calendar year. A minimum of 2.5 hours for each. To be held in a facility capable of holding 500+

Sincerely,
Richard Falconer

Date: May 9, 2023
To: St. George City Officials: Council, Mayor, and Recorder
From: SUFT--Southern Utahns for Transparency (782 S. River Road #88; St George UT 84790)
Subject: Public Comment on Restoring Trust

Hello St. George City Officials, and thanks for the many good things you do in our city! Unfortunately, two statements turned in before your deadline were not included in your 5/5/23 "public comment packet" last week: namely, two pages from Cecil P. Ash delivered in-person on 5/4/23 (his SG address was on his letter, and a blank petition was attached), and also one page from Southern Utahns for Transparency (SUFT) emailed before noon on 5/5/23 (our SG address was linked in our email). We are sending one page of comments today, with some added attachments, for a total of ten pages.

On 5/4/23, St. George resident Cecil P. Ash turned in **over 500 bi-partisan petitions signed by St. George citizens** over the last few months. In these petitions, **your constituents call for improved public comment policy for our city, along with specific measure to improve public trust in elections:** measures that any one of you can take (alone, or as a group) as you serve as the Board of Canvassers during 2023 municipal elections this year.

A small handful of friendly volunteers with limited time have been working to collect these petitions for several months and came to your 5/4/23 city council meeting prepared to present them during public-comment. When that was unexpectedly cancelled, these 500+ petitions were delivered to Annette from the recorder's office during a break in the meeting that night. Especially given the errors mentioned above, **we ask that the public record and minutes for your 5/4/23 St George City Council Meeting document how many petitions have been turned in from our city so far, along with the verbiage from the petition, below:**

"For over twenty years, countless cyber & national security experts (on both the Left and the Right) have warned that America's electronic election systems are vulnerable to outside interference. (For details, see "Election Integrity" at SouthernUtahnsForTransparency.com). It's no wonder why public trust in elections is so low across the U.S., and here in Washington County too.

One important solution is hand-counted elections, which were successfully done in America for over two centuries. Entire nations across Europe, plus Canada, Israel, etc, have switched back to hand-counting, with several American cities & counties already making the switch too. Washington County needs to do the same, and take the lead in Utah (as allowed by State Code 20A-5-302(1), etc). No matter what political beliefs or candidates are important to you, secure & fair elections must come first. [Therefore...]

We, the residents of Washington County [specifically St George City], call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.*
- (2) For 2023 municipal elections, begin voter canvassing and use Cast Vote Record Analysis (by an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.*
- (3) Immediately improve public comment policies for city/county governments in our area to align with all our fellow Class 1 & 2 Counties (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting)*
- (4) Immediately update gov't websites within Washington County with a grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time."*

[A sample petition is included (Attachment A; 1 page), and over 500 individual signed petitions were *confidentially* provided to the St. George Mayor, Recorder, & City Council last week. For the *public* record, a summary list of petitions signed is included here (Attachment B; 8 pages), with personal information concealed (email addresses and signatures have been redacted, and only the first two letters of the last and first name are shown, along with the first two numbers of the address).] Also please see: [Toplines - Election Integrity - August 1-2, 2022 - Rasmussen Reports®](#)

As the August 2022 Rasmussen Poll above shows, 62% of American voters don't trust our elections (82% of Republicans, 49% of Democrats, and 54% of the rest). We're seeing even higher percentages in St. George: as volunteers continue to gather these petitions, they find overwhelming support. When approached with petitions, **the vast majority of St. George City voters readily agree on the four critical bi-partisan points above, and we urge you to take action this month to improve public trust as your constituents have asked.** Lost faith in our elections is becoming a national crisis, and the solution involves securing our elections from the bottom-up, starting with city officials taking the lead this year. Please help restore trust. Thank you!

Washington County Petition

RESTORE TRUST IN ELECTIONS

Many nations have returned to securable hand-counted elections (For ex: see "Elections in France"-Wikipedia)

For over twenty years, countless cyber & national security experts (on both the Left and the Right) have warned that America's electronic election systems are vulnerable to outside interference. (For details, click "Election Integrity" on the bi-partisan website at top*). It's no wonder why public trust in elections is so low across the U.S., and here in Washington County too.

One important solution is hand-counted elections, which were successfully done in America for over two centuries. **Entire nations** across Europe, plus Canada, Israel, etc, have switched back to hand-counting, with several American cities & counties already making the switch too. Washington County needs to do the same, and take the lead in Utah (as allowed by State Code 20A-5-302(1), etc). No matter what political beliefs or candidates are important to you, secure & fair elections must come first.

URGENT CALL TO ACTION: HOW CAN YOU HELP?

For a list of several easy & important steps you can take, go to the website at top* and click "Take Action". Also, please be sure to sign the petition and share the website & petition with others via social media, text, email, etc.

--To receive occasional updates, send an email to: SUFTransparency@proton.me [and add it to your contacts].--

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and use Cast Vote Record Analysis (by an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Immediately improve public comment policies for city/county governments in our area to align with all our fellow Class 1 & 2 Counties (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting)
- (4) Immediately update gov't websites within Washington County with a grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so *the public is informed ahead of time* (similar to Davis & Salt Lake County websites).

***If needed, cross through any sections you'd prefer not to include (but all four steps are sorely needed to restore public trust).*

To: public-comments@sgcity.org

Dear Mrs. Mayor,

Yes, you will get the same people. Yes, some of them are grandstanding. Yes, meetings without comment time could perhaps be more efficient. However, the role of municipal government is to serve the people you represent. Why would you want to do anything to make it appear that is not the goal of the St. George City Council. Government is sometimes chaotic, sloppy and difficult. But, come on and buck up. Put a strict time clock on comments and sit and listen! That is a main tenet of your job. To listen to your constituents. To make the council more credible and give people more of an incentive to work with you rather than against you, please think again about prohibiting public comment. If you wish to make your meetings more "efficient," there are many ways to do that besides taking away the citizen's ability to speak to you in public. If I understand correctly, these comments will NOT be included in the packet? You may win the battle, but you are losing the war. You are starting down the road of allowing distrust to simmer among citizens. Make the right choice.

Kathie Wasserman

ST. GEORGE CITY
CITY RECORDER'S OFFICE

To: The Saint George City Council

From: Cecil P. Ash

Date: May 4, 2023

RE: Public Comment

Ladies and Gentlemen:

Let the public record and tonight's minutes reflect that on today's date, 5/4/2023, over 500 petitions from Saint George residents were turned in to be given to our Saint George city council members and our mayor.

As explained in the four points of the petitions (see details on the petition), residents are calling for improved public comment policy in Saint George City Council meetings, and restored trust in Saint George city elections this year.

Sincerely,

Cecil P. Ash

Washington County Petition

RESTORE TRUST IN ELECTIONS

Many nations have returned to securable hand-counted elections (For ex: see "Elections in France"-Wikipedia)

For over twenty years, countless cyber & national security experts (on both the Left and the Right) have warned that America's electronic election systems are vulnerable to outside interference. (For details, click "Election Integrity" on the bi-partisan website at top*). It's no wonder why public trust in elections is so low across the U.S., and here in Washington County too.

One important solution is hand-counted elections, which were successfully done in America for over two centuries. **Entire nations** across Europe, plus Canada, Israel, etc, have switched back to hand-counting, with several American cities & counties already making the switch too. Washington County needs to do the same, and take the lead in Utah (as allowed by State Code 20A-5-302(1), etc). No matter what political beliefs or candidates are important to you, secure & fair elections must come first.

URGENT CALL TO ACTION: HOW CAN YOU HELP?

For a list of several easy & important steps you can take, go to the website at top* and click "Take Action". Also, please be sure to sign the petition and share the website & petition with others via social media, text, email, etc.

--To receive occasional updates, send an email to: SUFTransparency@proton.me [and add it to your contacts].--

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
 - (2) For 2023 municipal elections, begin voter canvassing and use Cast Vote Record Analysis (by an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
 - (3) Immediately improve public comment policies for city/county governments in our area to align with all our fellow Class 1 & 2 Counties (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting)
 - (4) Immediately update gov't websites within Washington County with a grid that includes links to all minutes, recordings, & advance agendas with links to all items listed *so the public is informed ahead of time* (similar to Davis & Salt Lake County websites).
- **If needed, cross through any sections you'd prefer not to include (but all four steps are sorely needed to restore public trust).

Hello St. George City Officials, and thanks for the many good things you do in our city!

Yesterday, we turned in over 500 bi-partisan petitions signed by St. George residents over the last few months. In these petitions, your constituents call for improved public comment policy in our city, along with specific measures to improve public trust in elections that you can take as the Board of Canvassers during 2023 municipal elections this year.

These petitions were delivered to Annette from the city recorder's office yesterday. Although the personal information on them should be kept private, **we ask that the public record and minutes for 5/4/23 document how many petitions were turned in from our city, along with the verbiage from the petition, below:**

For over twenty years, countless cyber & national security experts (on both the Left and the Right) have warned that America's electronic election systems are vulnerable to outside interference. (For details, see "Election Integrity" at SouthernUtahnsForTransparency.com). It's no wonder why public trust in elections is so low across the U.S., and here in Washington County too.

*One important solution is hand-counted elections, which were successfully done in America for over two centuries. **Entire nations** across Europe, plus Canada, Israel, etc, have switched back to hand-counting, with several American cities & counties already making the switch too. Washington County needs to do the same, and take the lead in Utah (as allowed by State Code 20A-5-302(1), etc). No matter what political beliefs or candidates are important to you, secure & fair elections must come first. [Therefore...]*

*We the residents of Washington County Utah, call upon our county **and city officials** to do the following:*

(1) *Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.*

(2) *For 2023 municipal elections, begin voter canvassing and use Cast Vote Record Analysis (by an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.*

(3) *Immediately improve public comment policies for city/county governments in our area to align with all our fellow Class 1 & 2 Counties (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting)*

(4) *Immediately update gov't websites within Washington County with a grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time.*

As we gathered petitions locally (at fairs, festivals, parades, etc), we found that the vast majority of St. George City voters agree on these four critical bi-partisan points above, and we urge you to take action this month to improve public trust as your constituents have asked. (And if you've not yet seen the 500+ petitions from St. George residents, please let us know.)

Thank-you!

Southern Utahns for Transparency

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
 - (2) For 2023 municipal elections, begin voter canvassing and use Cast Vote Record Analysis (by an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
 - (3) Immediately improve public comment policies for city/county governments in our area to align with all our fellow Class 1 & 2 Counties (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting)
 - (4) Immediately update gov't websites within Washington County with a grid that includes links to all minutes, recordings, & advance agendas with links to all items listed *so the public is informed ahead of time* (similar to Davis & Salt Lake County websites).
- **If needed, cross through any sections you'd prefer not to include (but all four steps are sorely needed to restore public trust).**

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Effective immediately, improve Washington County public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting).
- (4) Effective immediately, update our County Commission website with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

- (2) For 2023 municipal elections, begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Effective immediately, improve Washington County public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting).
- (4) Effective immediately, update our County Commission website with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Effective immediately, improve Washington County public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting).
- (4) Effective immediately, update our County Commission website with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
 - (2) For 2023 municipal elections, begin voter canvassing and use Cast Vote Record Analysis (by an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
 - (3) Immediately improve public comment policies for city/county governments in our area to align with all our fellow Class 1 & 2 Counties (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting)
 - (4) Immediately update gov't websites within Washington County with a grid that includes links to all minutes, recordings, & advance agendas with links to all items listed *so the public is informed ahead of time* (similar to Davis & Salt Lake County websites).
- **If needed, cross through any sections you'd prefer not to include (but all four steps are sorely needed to restore public trust).

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Effective immediately, improve Washington County public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting).
- (4) Effective immediately, update our County Commission website with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Effective immediately, improve Washington County public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting).
- (4) Effective immediately, update our County Commission website with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Effective immediately, improve Washington County public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting).
- (4) Effective immediately, update our County Commission website with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Effective immediately, improve Washington County public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting).
- (4) Effective immediately, update our County Commission website with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Effective immediately, improve Washington County public comment policies to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting).
- (4) Effective immediately, update gov't websites in Washington County with a grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Effective immediately, improve Washington County public comment policies to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting).
- (4) Effective immediately, update gov't websites in Washington County with a grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Effective immediately, improve Washington County public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting).
- (4) Effective immediately, update our County Commission website with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Effective immediately, improve Washington County public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting).
- (4) Effective immediately, update our County Commission website with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Bi-Partisan Petition: Restoring Trust in Washington County

We, the residents of Washington County Utah, call upon our county and city officials to do the following:

- (1) Return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.
- (2) For 2023 municipal elections, begin voter canvassing and use Cast Vote Record Analysis (by an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.
- (3) Immediately improve public comment policies for city/county governments in our area to align with all our fellow Class 1 & 2 Counties (allow open public comment without signup: at least 3 min. each for unlimited persons, especially before any voting)
- (4) Immediately update gov't websites within Washington County with a grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Select to agree:: Washington county and city officials should return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.

Select to agree:: For 2023 municipal elections, Washington County should begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.

Select to agree:: Effective immediately, Washington County should improve public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup, and at least 3 min. each for unlimited persons, especially before any voting or election certification).

Select to agree:: Effective immediately, the Washington County Commission website should be improved with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Select to agree:: For 2023 municipal elections, Washington County should begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.

Select to agree:: Effective immediately, Washington County should improve public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup, and at least 3 min. each for unlimited persons, especially before any voting or election certification).

Select to agree:: Effective immediately, the Washington County Commission website should be improved with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Select to agree:: Washington county and city officials should return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.

Select to agree:: For 2023 municipal elections, Washington County should begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.

Select to agree:: Effective immediately, Washington County should improve public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup, and at least 3 min. each for unlimited persons, especially before any voting or election certification).

Select to agree:: Effective immediately, the Washington County Commission website should be improved with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).

Name: Jeff Krummenacher

Email: [REDACTED]nsn.com

Street Address: [REDACTED]

City, State, Zip Code: St George UT 84790

Select to agree:: Washington county and city officials should return to hand-counting ballots beginning with municipal primary elections this year (2023). This will restore public trust in elections by eliminating current vulnerabilities to software errors and/or digital manipulation.

Select to agree:: For 2023 municipal elections, Washington County should begin voter canvassing and Cast Vote Record Analysis (with the help of an independent professional statistician), as a further check against ballot-stuffing, which is another vulnerability in our election system.

Select to agree:: Effective immediately, Washington County should improve public comment policy to align with all our fellow Class 1 & 2 Counties in Utah (allow open public comment without signup, and at least 3 min. each for unlimited persons, especially before any voting or election certification).

Select to agree:: Effective immediately, the Washington County Commission website should be improved with one grid that includes links to all minutes, recordings, & advance agendas with links to all items listed so the public is informed ahead of time (similar to Davis & Salt Lake County websites).
