|--|---|

**Activities that need a permit:** An Air Quality Permit is needed for any construction activity that occurs upon 1 acre or more of land. Construction activities shall include but not be limited to: construction of commercial and residential structures, schools, libraries, churches, hospitals, parks, improvements to maintenance and land cleanup, soil and rock excavation or removal, soil or rock crusting or screening, filling, compacting, stockpiling and grading, explosive blasting, demolition, implosion, handling of building materials capable of entrainment in air (e.g. sand, cement powder), dismantling or demolition of building, mechanized trenching, landscaping, or establishing and/or using staging areas, parking areas, material storage areas, or access routes to or from a construction site.

**Fee Requirements:** Project involving the disturbance of land areas - \$25 per acre; Aggregate crushers, asphalt and concrete plants - \$300 for initial location / \$100 for renewal; Abrasive blasting, demolition projects, explosive blasting and landscape supply yards - \$100 with annual renewal applicable to ongoing business operations.

**Penalty and Fine for Non-Compliance:** If construction activity begins prior to obtaining a dust control permit the owner or operator shall pay a late fee of twice the normal fee. Each day in which the application and/or payment is not received, is considered a separate offense and separate fines may be assessed.

**Review Period:** The City of St. George shall have a minimum of ten (10) working days from the date that an application is received to either approve or reject the application and issue the air quality permit.

**Life of Permit:** This permit is valid for one (1) year from the date of issuance. Renewal of this permit is required unless all disturbed areas on the site are reclaimed or otherwise rendered invulnerable to fugitive emissions. The completion date is when the site has been fully reclaimed and the City has conducted a final inspection to verify site conditions. Where a construction site or any part of a construction site becomes inactive for a period of 30 days or longer, long-term stabilization shall be implemented with fourteen (14) days following the termination of active operations.

**Responsible Party:** The property owner and/or authorized agent are responsible for the dust control measures through the completion date. The property owner and/or authorized agent are responsible for ensuring that contractors, subcontractors, and all other persons abide by the conditions of the permit. If a violation of the Air Quality Ordinance occurs, a Compliance Advisory Notice will be issued as a warning to encourage prompt, voluntary compliance. Further violations shall result in administrative action that could result in fines not to exceed \$1,000.00.

**FUGITIVE DUST CONTROL REQUIREMENTS**

Reasonably available controls shall be provided to prevent fugitive dust emissions from becoming airborne. These controls shall be implemented on a 24/7 basis. The Development Services Department reserves the right to require additional control measures if the measures as stated herein are not employed, or prove to be insufficient to control fugitive emissions. Deposition of material on the public right of way either through erosion or tracking that is not cleaned promptly will be considered a violation and may result in a stop work order and/or violation.

**FUGITIVE DUST CONTROL EQUIPMENT AND METHODS (check all that apply)**

- Water Truck (capacity in gallons \_\_\_\_\_)
- Water Pull (capacity in gallons \_\_\_\_\_)
- Stand Tank (capacity in gallons \_\_\_\_\_)
- Fire Hydrant Hand Line Location
