St. George in the summer is full of opportunities! Yes, I know it’s hot -- really hot some days! But for those of us who’ve been here a while, we know it means less traffic, fewer people in your favorite restaurants, and plenty of time for hikes, climbs, trail rides, swims, boating, golf, and more. All one has to do is start early or go out late. Avoid the extreme heat. Wear sunscreen and a hat. Drink lots and lots of water. Be careful!

Every second and fourth Friday bring your family and friends to Town Square around 8 PM for “Sunset on the Square,” where you’ll enjoy food, games and a free family-friendly movie!

Georgefest, held on Main Street the first Friday evening of every month, continues to draw bigger and bigger crowds. I think everyone enjoys getting out for some good food, music, dancing, shopping, and just plain fun. You’ll find there’s something for everyone!

Tuacahn has three blockbuster shows this season: Shrek, Newsies, and Mamma Mia! Professional actors from across the country combine with local talent to present these incredible shows.

St. George Musical Theater in collaboration with Kenworthy Productions is producing local favorite Saturday’s Warrior from late June through the third week of July. Brigham’s Playhouse in Washington is featuring You’re A Good Man Charlie Brown and High School Musical Jr.

St. George will be celebrating Independence Day weekend this year with something new: a full carnival in Town Square with all kinds of rides and attractions held on Friday, Saturday, Sunday, and Tuesday July 4th. The evening of the 4th Diamond Rio and Sawyer Brown will be in concert at Legend Solar Stadium at Dixie State University followed by the best fireworks show of the year! It’ll be fantastic!

Also new this year will be Merrill Osmond’s Pioneer Day Legacy Celebration held on July 24th also at DSU’s Legend Solar Stadium. It promises all the best of our local talent combined with the expertise of Merrill Osmond and his team.

These are just a few of the many organized activities and events available over the summer. So whether you prefer creating your own fun, joining in some of these events, or a combination of both, you’re in for a great summer in St. George!
Tuacahn Amphitheatre sits in the majesty of Padre Canyon formed by nature eons ago. A place so magical it takes your breath away. Now the Dixie State University DOCUTAH International Documentary Film Festival joins with Tuacahn Amphitheatre to present Tuacahn: Miracle in Padre Canyon, a documentary which intertwines the history of this place with a behind the scenes look at just how the production of Shrek the Musical came together.

On September 4th, to kick off its eighth season, DOCUTAH will host a gala dinner event at Tuacahn for the world film premiere. The DOCUTAH festival runs from September 5 – 9 at Dixie State University in St. George, Utah. “This is a tale of two productions. One is the history of the canyon and the vision which created Tuacahn Amphitheatre as a venue for professional, world-class family entertainment: The other is the story of how a complicated Broadway show is developed and configured to utilize and adapt to the natural wonder of Padre Canyon,” said Phil Tuckett, Producer and Writer as well as Festival Director for DOCUTAH.

Kevin Smith, CEO of Tuacahn, gives great credit to David and Nanette Pugsley. “It was their vision in seeing how a documentary about Tuacahn, produced by DOCUTAH, was a perfect fit for two institutions dedicated to advancing the arts and education.”

“Once we got together with Phil on this project, we saw it as an opportunity for two great institutions to do something together, to bring something awesome to our community. It seemed like a perfect fit. Very few places are lucky enough to have Tuacahn and DOCUTAH,” said Nanette. “We knew that DOCUTAH was the right venue to tell this story. Tuacahn’s mission fits with our mission, which is not only to entertain but also to educate. Just as Tuacahn High School students can avail themselves of the knowledge industry professionals bring to their campus each year, DSU students are always involved with the DOCUTAH Festival and in the production of the student films we produce each year,” said Tuckett.

“Using historical stills and film to reveal the story of the creation of Tuacahn Center for the Arts and Tuacahn Amphitheatre, we demonstrate what the founders first envisioned - that Padre Canyon could be more than just landscape - and then we bring the audience through the first audition and opening night for Shrek: The Musical,” continued Tuckett.

David Pugsley, a member of Tuacahn’s board for six years, and his wife, Nanette, have been involved with Tuacahn for many years. “When we started thinking about a documentary, We approached Tuacahn’s Creative Director, Scott Anderson,” remarked Dave. Scott said we had to speak with Phil Tuckett. Lucky for us, Phil immediately saw the value in the idea.

Any place an audition was held for Shrek, Tuckett and his Director/Director of Photography, Ben Braden were there - Los Angeles, New York, Salt Lake City, Tuacahn- capturing the drama and documenting the evolution of the work. They worked closely with Anderson as sets were built, wardrobe designed, makeup created and rehearsals took place.

“Most of the film was shot on-site at Tuacahn from the beginning through completion. It was a great experience,” said Ben. “DOCUTAH’s role was invaluable. This documentary is about the people involved in Tuacahn and Shrek. DOCUTAH’s role was to show what it was like to them.”

Information about the dinner Gala and Screening on September 4 can be found at docutah.com. Tickets for the Gala and film can be reserved through the Tuacahn Website at www.tuacahn.org/DOCUTAH. Information about the 2017 DOCUTAH International Documentary Film Festival can be found on the DOCUTAH Website at docutah.com. Festival tickets will be on sale through the DSU Box office in mid-July.
More than one-thousand Horseshoe pitchers from 47 states and 5 countries are bringing their ringers to St. George July 17-29, 2017 for the 100th annual World Horseshoe Pitching Championships.

This marks the 2nd time in four years that St. George has hosted the event and the 14th time the tournament will be held in Utah. No other state has hosted the event as often. Similar to the Olympics, the tournament moves to a new location each year and communities present bids to the National Horseshoe Pitchers Association (NHPA) for the opportunity to host the event.

"Hosting the event for the second time in a four-year span shows what a high-quality host St. George has become, and carries on the tradition of Utah being a great location for the world championships," Lewis said. "The response from pitchers has been phenomenal. Those who participated in St. George in 2013 are excited to come back and many of them are planning extended vacations this time so they can take advantage of all of the great sites and activities in our area."

Estimates show that while they are here, participants will inject between $3-4 million into the local economy.

In 2013, World Champion Alan Francis set a world record when he pitched 93% ringers for the entire tournament. Lewis said the tournament is a "fun spectator friendly event" that utilizes the convention center during the shoulder season. "It's a great complement to the variety of sports we are known for here."

### 2017 World Horseshoe Pitching Tournament

July 17-29, 2017

Dixie Convention Center

**Best time for Spectators:**

- **July 17:** 9:00am Golden Ringer VIP Tournament
- **11:00am:** Opening Ceremonies
- **July 22:** 2:00pm Junior Pitching Championships
- **July 29:** 10:00am World Champion Final Rounds

St. George Rolls Out It’s Patriotism for the 4th of July

By: Della Lowe

The City of St. George has even grander plans this year for America’s birthday and is bringing all the fun to the center of town. This year, the City of St. George 4th of July Celebration will take place at Town Square. The schedule kicks off at 6:30 A.M. with the traditional Uncle Sam 4k race, sponsored by Western Rock. After working up an appetite, runners and celebrants can chow down with a hearty breakfast from 7:30-10:00 A.M.

The annual parade, sponsored again by Stephen Wade, begins at 7:45 A.M. at 800 E and ends at 200 W on Tabernacle. Community members can line the streets to cheer on the colorful floats and parade entries and kick off the rest of the day. The fun continues all day and deep into the night. There will be music, food booths, contests, Slip-n-Slides, tons of games and countless ways families can have fun together as they celebrate our nation’s 241st birthday.

New and exciting this year is the Independence Carnival. It will come right into the center of town with huge carnival rides and a midway full of games to test players’ skills. This is the first time a carnival has been allowed downtown and it should make a fun-filled addition to the annual 4th of July event. The Carnival rides start at 10:00 A.M.

Here is a quick list of just some of the many events and activities for the day.

Games
- BB Shooting Arcade
- Giant 4 in a Row
- Cornhole/Bean Bag Toss
- Giant Scrabble
- Paper Rocks
- Shuffle Board
- Ben Bag Toss
- Jenga
- Make the Basket

Activities
- Yoga (Contest Stage)
- Zumba (Contest Stage)
- Talent Show (Main Stage)
- Scavenger Hunt (Art Museum)
- Karaoke (Gazebo)
- Bingo (3rd Floor, Art Museum)
- Arts and Crafts (3rd Floor, Art Museum)

The day wraps up with the 99.9 Kony Country 4th of July Celebration concert beginning at 8:00 P.M., which, this year, features Diamond Rio and Sawyer Brown. Of course no 4th of July celebration would be complete without firework, which start at 10 P.M. The concert and fireworks are presented by Intermountain Dixie Regional Medical Center, Ken Garff St. George Ford, SkyWest Airlines, Andrus Transportation, Red Rider Creative, Dixie State University, and the City Of St. George.

"The 4th of July is a wonderful time for all Americans here, in St. George, the spirit of patriotism, fun and family all come together on this great day,” said Aaron Metler, Recreation Coordinator for Races and Special Events. "Putting together this celebration is something I look forward to each year because the end result is so inspiring. The whole town turns out and has a great time."

The City of St. George is partnering with Canyonland Party Rentals and Carnival Midway Attractions to bring the Mega Pass to the Independence Day Celebration. The Mega Pass is a unique opportunity to gain unlimited access to all the rides, attractions, and events that are part of the Independence Day Celebration.

Mega Pass
- Carnival Rides
- Inflatables
- Climbing Wall
- Games
- City Pools
- Rec Center
- Children’s Museum
- Carousel Rides

Complete information about all the activities of the day can be found at www.sg4th.com in the 1870s. It is an opportunity to observe the commitment and strength of the settlers and step back in time about 140 years.

The tours start June 1 and end August 31. The pre-tour activities begin at 9:45 A.M. Tuesdays through Saturdays during June, July and August. A bus is provided and original buildings are the settings for the actors. Tickets can be purchased at the Art Museum, 47 East 200 North. They are $3 for anyone 12 and older; children are free with an adult. For special group tours or other information call Carolyn at 435.703.9924.
Its production did not contribute significantly to the area also produced silk as early as 1874, but cotton proved an unsuccessful venture. The area hailed from the South and possessed the necessary skills to grow cotton, if possible. Many of these families assigned to settle the area from the South and possessed the necessary skills to grow cotton and establish a community. Paying homage to the pioneers that originally settled the area. In the late 1970s and mid 1980s, the structure is the longest continuously operated Mormon Temple in the world.

In 1951, to commemorate the 50th anniversary of St. George's settling, the Dixie Academy building was constructed. The LDS Church operated the academy until 1973, when it became a two-year college within Utah's higher education system. The new Dixie College campus opened in the southwestern corner of the city in the 1980s. Today, Dixie State University boasts an enrollment of approximately 10,000.

In 1865, St. George began to take off as a tourism destination with the construction of the area's first 9-hole golf course, Dixie Red Hills, which is located behind the large red bluff at the corner of Sunset Boulevard and Bluff Street. Since that time, 12 additional golf courses were built in Washington County and these areas have been coined the nickname of 'The Palm Springs of Utah' largely due to the number of golf courses and vacation resort developments.

Also in the 1960s, with the advent of all-conditioning in vehicles and homes, people who once considered St. George inhospitable or hostile due to its extreme summer temperatures began to plan vacations to the area and many ended up establishing a permanent residence in southwestern Utah.

Today, St. George is the largest city in Washington County and the eighth-largest city in Utah. Its metropolitan area is home to nearly 85,000 residents. It has consistently ranked as one of the fastest growing areas in the nation for the last two decades, even surpassing Las Vegas in per capita growth. New residents from across the country and Canada are attracted to St. George’s scenic beauty, world class healthcare, mild climate, active lifestyle and its close proximity to unparalleled outdoor recreation, including Snow Canyon State Park, Quail Creek and Sand Hollow Reservoirs, Zions National Park, Bryce Canyon, Lake Powell and Grand Canyon National Park.

St. George is currently going through a transitional period as its economy continues to diversify. Aside from the service industry, largely related to a strong tourism market, the area is also heavily reliant on commercial and residential construction. Growth spurs in the 80s, 90s and early 2000s meant a significant increase in the number of construction related jobs. An emerging industry that will likely become the area's largest economic engine aside from tourism, is the healthcare industry.

Intermountain Healthcare owned, Dixie Regional Medical Center, which has experienced significant growth over the last 15 years and it doesn't appear to be slowing down anytime soon. The hospital is undergoing a $300 million expansion which is the largest construction project valuation to date in the history of St. George and Washington County. A new partnership between Intermountain Healthcare and University of Utah Medicine will bring hundreds of scientists, doctors and lab technicians to the area as they conduct research and treat patients as part of the Genomics Precision Medicine project. The result could mean a number of spin-off biotechnology companies and related businesses in the area.

The St. George Regional Airport opened in 2011 and has seen a steady growth trend every year since SkyWest Airlines, the world’s largest regional airline is headquartered in St. George and operates all daily flights to Salt Lake City. Denver and Phoenix through its partnerships with American Airlines, United Airlines and Delta Airline. The original construction of the airport, no jet service was available in Washington County because of the constraints of the old airport which was located on the mesa immediately west of downtown St. George.

The old airport site is owned by the City of St. George and is being planned as the future site for a lifestyle technology park for start-up technology focused companies. The 160-acre mesa top will soon be home to a 30,000 square foot campus for the Dixie Applied Technology College and a digital film studio for Dixie State University. It is anticipated that total build out of the mesa could take a decade or more.

Downtown St. George is also going through a renaissance of sorts. The city is leading to more redevelopment or brownfield projects in the city's core. Instead of one and two story buildings, developers are designing mixed-use structures up to five stories that will accommodate residents above commercial space on the ground level. Two, multi-level, mixed-use developments are underway within a couple of blocks of each other downtown. City View and Joule Plaza. Recently conducted market studies indicate that there is a market for higher density, urban living in the downtown. Millennials as well as seniors are more interested today in living within walking distance of work, grocery stores, gyms, parks, trails and other amenities. We are beginning to see a real resurgence of traditionally planned/ designed neighborhoods downtown.

Recently, a 330-acre proposed development was presented to St. George elected officials. The development, Springville, located on the north side of the town, will be built on property purchased from the School and Institutional Trust Lands Administration and include 10,000 residential units, and large commercial developments. The main access to the development will be along exit 2 on I-15 and run east along the Southern Parkway toward the airport. The master planned development will likely take several decades to complete.
Conservation: It’s About

The summer heat has arrived. It’s the time we run our air conditioners the most and use a lot of water outside. It’s also the time when we can save money by reducing our use.

Landscaping

You can save the most water by irrigating your landscapes as efficiently as possible. Every sprinkler system is as different as every landscape. There is no one right answer for how long to run your sprinklers. Some tips are listed below:

- Water deeply and infrequently to encourage deep root growth that can withstand the summer temperatures. Water long enough to get 5/8” of water into the soil with each irrigation day.
- If water is running off, it is no longer going into the soil. Consider cycling the timer, irrigate for a short time, allow the soil to absorb the water and run the system again for a short time repeating as needed to get a good deep watering. It may take anywhere from 30 to 60 minutes to for the water to soak in depending on how much clay is in your soil. Cycling the irrigation time avoids run off and gets the water to the root system where it is needed.
- Water between 8:00 pm and 8:00 am. You’ll lose much less water to evaporation if you water when temperatures are cooler. The city council has made this a mandatory requirement for those who irrigate with culinary (drinking) water.

There are large irrigation users who use irrigation quality water which includes reuse water from the waste water treatment plant. These are users such as the city golf courses, parks and cemeteries, many school district facilities, and Dixie State University. Because the production and storage capacity of this system is limited and the users have large areas to irrigate, watering will be done as needed and the irrigation quality water which includes reuse water from the waste water treatment plant. This allows us to extend existing drinking water resources further and maximize the water rights available to the City.

If you’re unsure about how to best water your lawn, schedule a free water check. A trained college intern will run your system and determine how much water it applies to the lawn in a given amount of time. They will also give you some information on your soil type, water pressure and overall evaluation of the sprinkler system. A customized irrigation schedule will be provided to help you water your lawn as efficiently as possible.

You can schedule an appointment by contacting the Washington County Water Conservancy District (WCWCD) at 435-673-3617. The WCWCD also has some rebates available for installing smart irrigation controllers. Smart irrigation controller’s water based on weather conditions and/or soil moisture levels. Take advantage of the rebates and save on your water bill as well.

The city’s WaterSense Toilet Rebate program recently ended. This program was funded through grant funding from the Bureau of Reclamation and funds from the WCWCD and the City of St. George Water Services Department. The program provided rebates for 1,010 toilets. Based on a review of a percentage of participants and estimated water saving of approximately 1,100,000 gallons annually will be seen as a result of more efficient toilets in homes and hotels. This means there is also a savings in waste water treatment costs as there will be that much less sewage flowing to the waste water treatment plant.

Generally, the highest utility bill in the summer is the electric bill. It powers our air conditioners and pool pumps, both of which are running often this time of year. Managing your power use can save you big money.

Air Conditioning

- It is recommended to set your thermostat to 78 degrees when you’re home. Use fans to circulate the air, the wind chill effect helps you feel more comfortable. Generally, you can keep a room 2 – 4 degrees warmer and still feel comfortable with fans moving the air. Turn the fans off when you leave the room, fans cool people not the room.
- Change the filters regularly, follow the manufacturer’s suggestion. Changing the filters every 45 – 90 days is a common recommendation.
- Schedule regular maintenance for your cooling system.
- Avoid placing lamps or TV sets near the thermostat as they generate heat and may cause the unit to run more frequently or longer than needed.
- Vacuum registers regularly to remove any dust buildup. Make sure that nothing blocks the airflow from through the registers.

The Energy Services Department will be hosting a workshop on the topic of Air Conditioning Efficiency. Curt Croft with Dixie Applied Technology College is presenting the workshop. It is free and open to the public. It will be held Wednesday, July 10, 2017 in the City Council Chambers at City Hall (175 east 200 North) from noon to 1:00 pm.

Pools

- If you have a pool, you can save money and maintain a comfortable swimming pool temperature by using a smaller, higher efficiency pool pump and operating it less.

The pump should be sized to match the hydraulic characteristics of the pump to both the piping and the pool’s flow characteristics.
- Run the pump less. Circulating the water keeps chemicals mixed and removes debris. As long as the water circulates, while the chemicals are added, they should remain mixed. Most debris can be removed by using a skimmer or vacuum. Consider reducing filtration to six hours per day. If the water doesn’t appear clean, increase the time in 30 minute increments until it does.
- A timer can be installed to operate the pump’s cycling. If debris is a problem, consider cycling the pump. Several short cycles may keep the pool cleaner all day.

General Energy Efficiency Tips

- Avoid using the oven, cook on the stove, microwave or grill outside.
- Install efficient lighting that runs cooler. LED and CFL’s use less energy and generate much less heat than standard incandescent lighting.
- Wash only full loads of dishes and clothes.
- Take short showers rather than baths. This reduces the amount of hot water you use, reducing hot water heating costs.
- Close drapes/shades on windows receiving direct sunlight, particularly west facing windows in the afternoon and evening when the temperatures are generally the hottest. This will help reduce the amount of radiant heat from outdoors coming into your home.

A St. George Tennis Star & Star Human Being

Broden Lund began his tennis journey 3 years ago through the St. George Tennis program held at the Tonaquint Tennis Center. He began in the Jr. Development program doing clinics and private lessons with Coach Wayne Bullock. He immediately fell in love with the game and became very dedicated. Broden was always out at the courts practicing his strokes. He picked up the sport quickly, and found himself playing top JV his freshman year for Snow Canyon High School.

That same year Snow Canyon took state as a team, the first state tennis championship ever led by our very own Eric Mathis, who coached the team. His Sophomore year Broden made the varsity squad at Snow Canyon playing and doubles and qualifying for State in Salt Lake. Broden was rapidly becoming a top player in High School. His Junior year he continued to play varsity and was becoming an expert doubles player. Broden played 1st doubles for his team and won the State Championship for Snow Canyon playing 2nd doubles and qualifying for State in Salt Lake. Broden was rapidly becoming a top player.

He immediately fell in love with the game and became very dedicated. Broden was always out at the courts practicing his strokes. He picked up the sport quickly, and found himself playing top JV his freshman year for Snow Canyon High School.

“I knew he would be a great coach. I couldn’t wait to hire him,” Coach Wayne states. “But Broden is so much more than a tennis player. He is also a great human being, who exhibits the best qualities of our young people.”

Outside of his playing and teaching tennis, Broden is a special needs mutual counselor. Once a week he works closely with the special needs group helping them with activities. But Broden went beyond those duties. Earlier this year, he surprised a young special needs girl and took her to a High School dance. Broden just wanted to make sure he could give a special evening to a young high school girl, who might otherwise have been left out.

“Huge shout out to an incredible young man, Broden Lund, who went above and beyond to make Amber feel super special for her Jr. Prom assembly,” said Amber’s proud Mom, Michelle Graves.

Broden continues to coach the 10 n Under players as well as the Jr. Development players and some of the ATP Beginner players. He just passed his 10 n Under certification through the USTA. He is also running the Wednesday night mixer pickleball league and is a vital component to the pickleball leagues, helping in the tournament desk, referee desk, and other tasks.

“When you think that the world is in bad shape and young people are not engaged and caring, I hope you will think of Broden and know that there are many young people around us who genuinely open their hearts to each other,” said Wayne.

As in 2007, the Museum is featuring the 4 major artist groups, an opportunity to exhibit the variety and quality of art in southern Utah. These artists are sharing the Museum from April 29th through August 16th.

The Dixie Watercolor Society (DWS) is an organization dedicated to promote, encourage, educate and advance watercolor artists and painting through meetings, demonstrations, lectures, workshops, classes and shows for the benefit of DWS members, other artists and the general public. Regular DWS meetings feature: demonstrations, guest artists, lectures, critique sessions, show and share, and activity information as well as open discussions on new ideas, materials, and opportunities to show and sell. Complete detailed information is available on their website: www.dixiewatercolorsociety.com.

The Color Country Camera Club is a fellowship of people with a mutual interest in photography. They routinely gather at meetings and on field trips to share photographic knowledge and experiences. Participants are at all levels of expertise, beginners to professionals. There are no fees or by-laws. A volunteer steering committee keeps the club organized, moderates the meetings and provides membership communications. Learn more about the CCC at: www.colorcountrycameraclub.org.

The Washington County Fiber Artists share a love of textile. Originating with a passion for quilting, these artists have each bloomed into fiber artists beginning with many techniques the mother art, quilting, bestowed upon them and then expanding upon the basics. The traditional craft of quilting morphed into a more exaggerated art form, through the expansion of imagination, the relaxing of rules and the addition of new techniques and materials, creating the beautiful artwork called “Fiber Art.”

The Southern Utah Art Guild (SUAG) promotes the growth and development of the visual arts throughout Southern Utah by providing opportunities for members to display and sell their art, education through classes and workshops, and support for its membership including individuals, patrons and organizations. The SUAG welcomes both the novice and professional artist from all visual art mediums. The Southern Utah Art Guild offers six "open shows" per year for its members in the Red Cliff Gallery and operates the Arrowhead Gallery, a co-op gallery, where members can have a true gallery experience. Information about the Southern Utah Art Guild can be found on its websites:

When the weather turns warm, everyone wants to be in or around the water. Hanging out at the pool or lake on a hot day is a great way to beat the heat. Between having fun and putting on sunscreen, most people don’t think much about water safety—but they should. Drowning is the second leading cause of accidental death for people between the ages of 5 and 24. That unfortunate statistic can be changed though. Most water-related accidents can be avoided by following a few simple safety guidelines. First and foremost, of course, is learning how to swim if you plan on being on or near water.

Swimming Smarts
Swim with a Buddy! Always swim with a partner, every time—whether you’re swimming in a backyard pool, in a lake or in the ocean. Even experienced swimmers can become tired or get muscle cramps, which might make it difficult to get out of the water. When people swim together, they can help each other or go for help in case of an emergency.

Know your limits. Swimming can be a lot of fun but if you’re not a good swimmer or you’re just learning to swim, don’t go in water that’s so deep you can’t touch the bottom and don’t try to keep up with skilled swimmers. That can be hard, especially when your friends are challenging you, but this advice can save your life.

If you’re a good swimmer and have had lessons, keep an eye on your friends who aren’t as comfortable or as skilled as you. If it appears they’re getting tired or a little uneasy, suggest that everyone take a break from swimming for a while.

Swim in safe areas only. It’s a good idea to swim only in places that are supervised by a lifeguard. No one can anticipate changing ocean currents, rip currents, sudden storms, or other hidden dangers. In the event that something does go wrong, lifeguards are trained in rescue techniques.

Swimming in an open body of water (such as a river, lake, or ocean) is different from swimming in a pool. You need more energy to handle the currents and other changing conditions in the open water. If you do find yourself caught in a current, don’t panic and don’t fight the current. Try to swim parallel to the shore until you are able to get out of the current, which is usually a narrow channel of water. Gradually try to make your way back to shore as you do so. If you’re unable to swim away from the current, stay calm and float with the current.
